

As a loyal satellite radio listener, i am disgusted to learn that you would have the nerve to take away a service that i use on a daily basis, for purely monetary reasons. This is what makes this government, and its agencies, ineffiecient, overbearing, and completely useless when it comes to fiscal responsibitlites. Dont you have better things to do than attack a service that i pay for, and depend on??? Get your heads out of your you know whats, and worry about something that could actually use your attention. Local programming doesn't provide the up to date, and in depth info that i get from XM radio, so why should i suffer because you believe you have the right to limit what i should, and should not be able to listen to.
